

THE PEOPLE WE SERVE

2 West... Saratoga's newest upscale dining establishment needed the complete suite of ALLSTAR products. We designed an integrated television system including a video wall with a multi zone audio system that sounds great in all areas of the premise. Our URC based control platform made running everything easy and efficient. We also delivered a comprehensive HD CCTV surveillance system to protect the investment just like at their Wheatfields locations. Everything installed by one Team saving both time and money.

Global Foundries... This multi-national called upon us to bring in television service to several buildings on their large manufacturing and R&D campus. We delivered a DirecTV® solution to several buildings with their specific line-up of local, national and international channels without a bunch of channels they did not want. We worked seamlessly with their other contractors and integrated our system into their existing infrastructure on time and within budget.

Carson's Woodside... This is the second location for this owner where we delivered an integrated solution to their A/V needs. We created a complete television and audio system that creates either a sports tavern, trivia bar or late night club atmosphere while also being a nice casual restaurant. Digital signage was also installed so the owner can promote his messages to guests easily while a master remote runs it all. A robust camera surveillance system with remote viewing capacity helps to protect the business.
