

THE PEOPLE WE SERVE

Swiftys... We have helped the owners of Swiftys at all three of their location's to create a dynamic atmosphere that can be a casual dining restaurant, sports pub or late evening venue. Our solution included large panels in all areas including the banquet room with versatility to show sports from DirecTV,[®] digital signage, trivia player, local cable or any internet based programming.

The entire system is controlled from a single remote from anywhere within the facility. Our surveillance solution includes cameras for all interior areas including the basement as well as the front patio and rear lot and entrance.

MillionAir... At their new showcase property at Griffiss airpark, MillionAir wanted video systems within their public access areas, private offices, employee break room and their pilots lounge. Within the pilots lounge we created a robust theater environment that includes a large flat panel with BluRay, DirecTV[®] and computer access all pumped through a sound system with subwoofer. All this is run simply by one master remote so anyone can use all the capabilities with ease.

Retro Fitness... Our designers created the ultimate AV system at Utica's newest full service gym. We integrated all the large panels with inputs from multiple sources along with a multi zone audio system throughout the facility. The audio allows directed paging as well as pumping beats in the cardio area. We also created a big screen theater experience in the stationary bike room which creates the sensation of riding outdoors

on programmed courses as well as regular television channels and movies. They chose HD cameras in all appropriate areas to protect their investment as well.
